Subject: [External] Comments for Docket 2019-224-E and 2019-225-E Reject Duke's IRPs

Dear South Carolina PSC,

I'm writing to ask that you reject Duke Energy's 2020 Integrated Resource Plan (IRP) in our state.

Duke's current plan continues to invest in fossil fuel consumption that harms our planet and our people. It is short-sighted and misguided. Duke has the money, the resources, and the power to encourage renewable energy in many different ways and should be encouraged to do so, for the benefit of the people it serves.

Carolinians look to the commission for clarion leadership toward clean energy now more than ever. Please reject Duke's IRP in favor of a plan that puts clean energy and climate justice at the forefront.

Sincerely,
Brandy Laurencelle
Fletcher, NC 28732-9439
